

EX. 5: Dashboards in Zoho Creator

Name: Subhalakshmi M

Register No. : 240701539

AIM

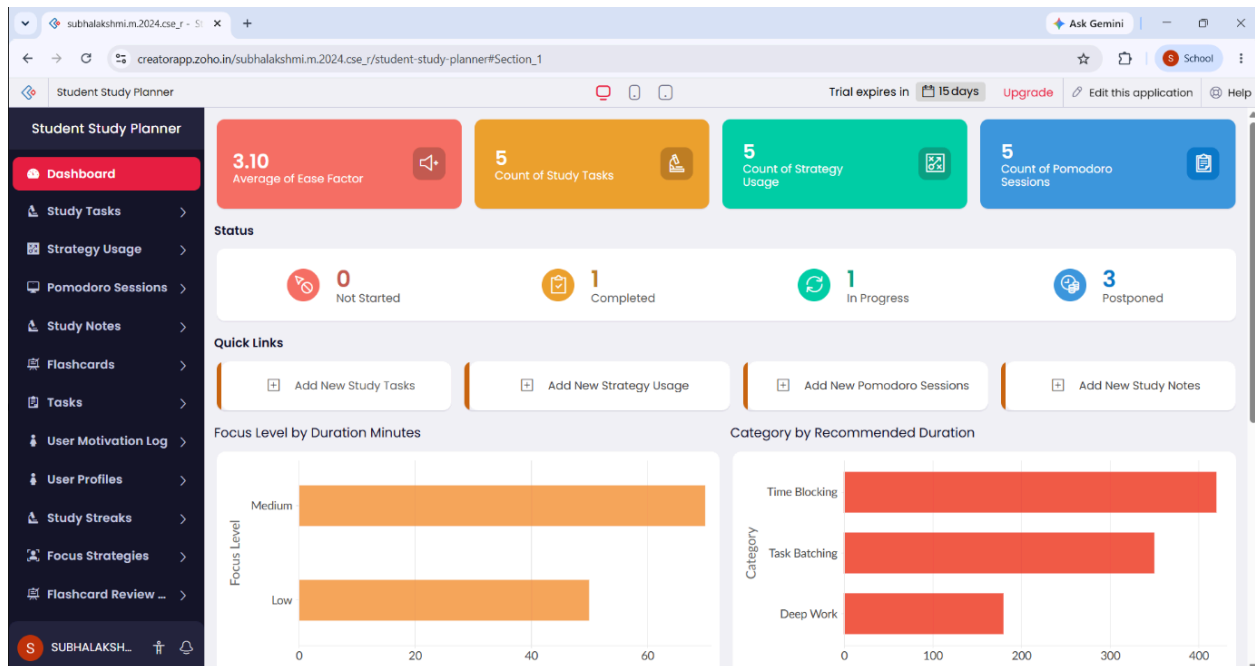

To create and configure a dashboard in Zoho Creator to present important information from the Student Study Planner application in a simple and visual manner.

PROCEDURE

1. Open the Student Study Planner application in Zoho Creator.
2. Create and add the required study-related forms and sample records.
3. Create a dashboard for displaying the application information.
4. Add suitable summary panels, charts and quick links to the dashboard.
5. Configure the dashboard components to display the required study data.
6. Arrange the components for clear and easy viewing.
7. Save and preview the dashboard.

OUTPUT

1. Student Study Planner Dashboard

The dashboard provides an overall view of the study planner application. It contains summary cards for Average Ease Factor, Study Tasks, Strategy Usage and Pomodoro Sessions. It also displays the current study status and provides quick links for adding new study tasks, strategy usage, Pomodoro sessions and study notes. The dashboard also contains graphical representations such as Focus Level by Duration Minutes and Category by Recommended Duration, which help in viewing the study-related information visually.

2. Dashboard Records

Session ID	Start Time	End Time	Duration Minutes	Is Completed	Focus Level	Task	User
5	24-Jul-2026 16:00:00	24-Jul-2026 16:25:00	25	true	Low	1 2 3 4 5	1 2 3 4 5
4	24-Jul-2026 14:30:00	24-Jul-2026 14:55:00	25	true	Low	1 3	2 3
3	24-Jul-2026 10:15:00	24-Jul-2026 10:40:00	25	false	Medium	1 2 3 4 5	1 2 3
2	24-Jul-2026 09:00:00	24-Jul-2026 09:20:00	20	true	Medium	1 2 4	1
1	24-Jul-2026 08:00:00	24-Jul-2026 08:25:00	25	true	Medium	1 3	1 2 3 4 5

The dashboard also displays the stored study task records with details such as task title, description, due date, priority and status. This allows the user to view and monitor study activities from a single dashboard.

RESULT

Thus, a Student Study Planner Dashboard was successfully created in Zoho Creator. The dashboard displays study-related information using summary cards, charts, quick links and reports, making the stored information easier to view and monitor.
