

EX. 3: Application Building Using Zia Assistant

Name: Subhalakshmi M

Register No.: 240701539

AIM

To create a Student Study Planner application using Zia Assistant in Zoho Creator and generate forms, reports, dashboards and other application components using natural language instructions.

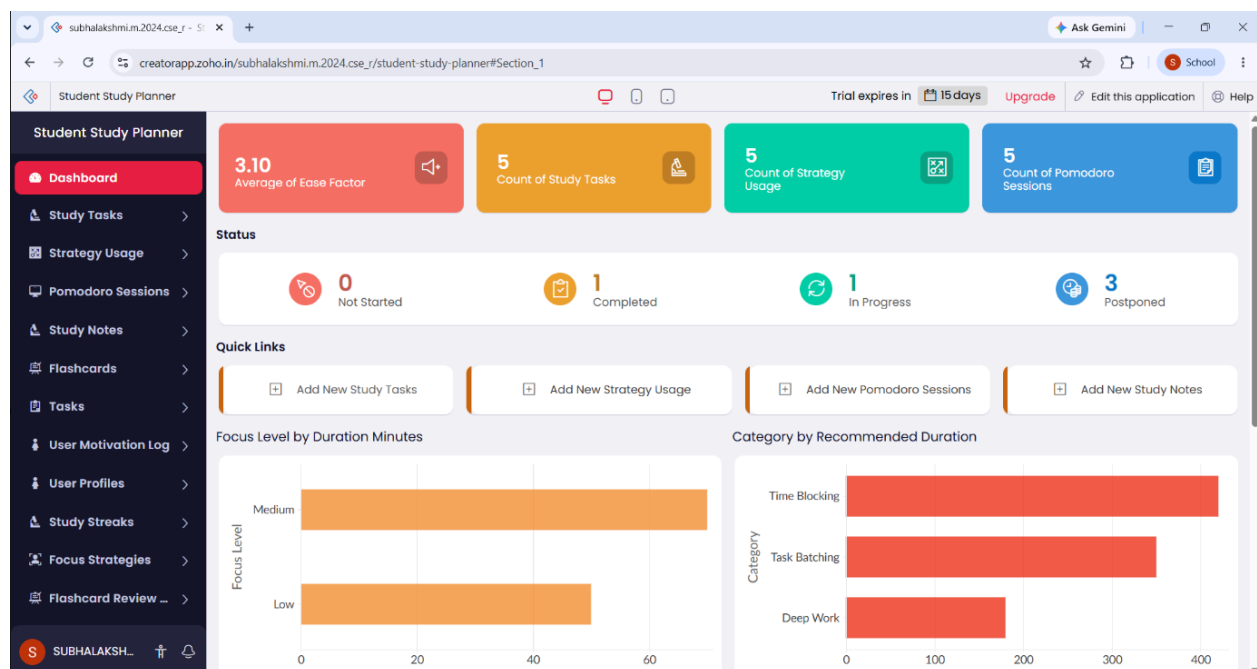

APPLICATION CREATED

Application Name: Student Study Planner

The application is designed to help students organize their study tasks, track study sessions, maintain notes and flashcards, and monitor their study progress.

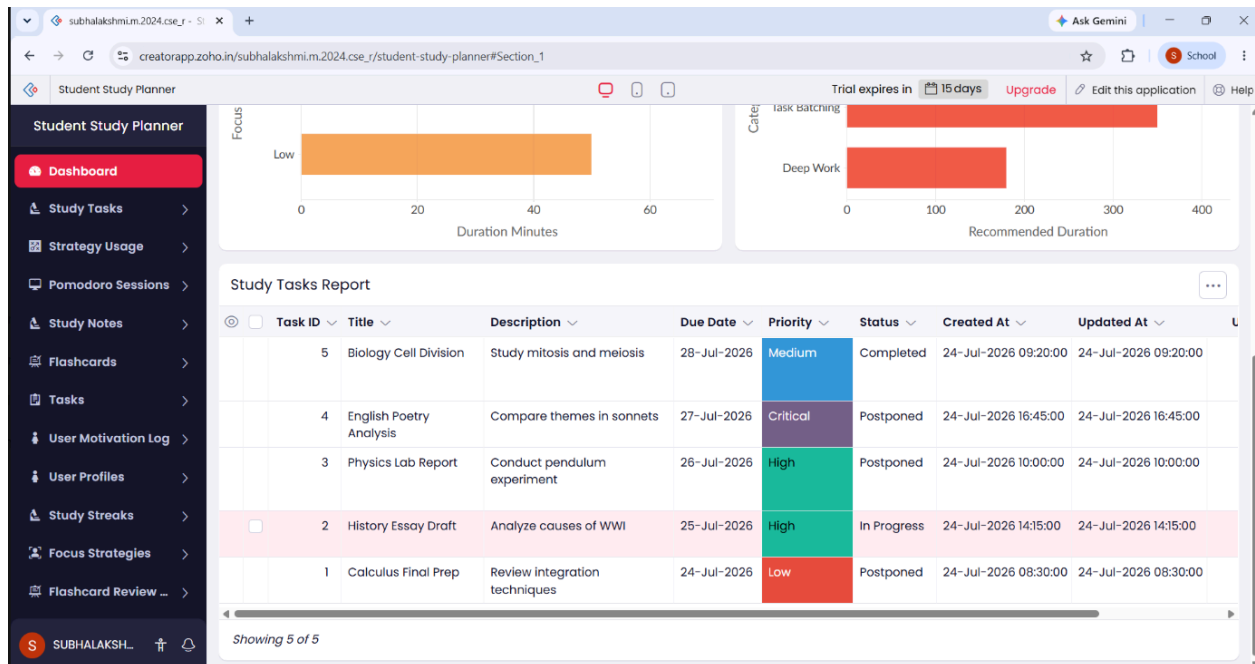

OUTPUT

Screenshot 1 – Student Study Planner Dashboard

The dashboard displays an overview of the study planner application. It contains summary cards for study tasks, strategy usage and Pomodoro sessions. It also displays status information and graphical representations of study-related data.

Screenshot 2 – Study Tasks Report

The Study Tasks Report displays the study tasks stored in the application along with details such as task title, description, due date, priority and status.

Showing 5 of 5

The Board view organizes the Pomodoro sessions according to their focus level. The records are displayed under categories such as High, Low and Medium.

Screenshot 5 – Flashcards Board

The Flashcards Board organizes the flashcards based on difficulty levels such as Easy, Medium and Hard.

APPLICATION COMPONENTS

The Student Study Planner created using Zia contains the following major components:

- Dashboard
- Study Tasks
- Strategy Usage
- Pomodoro Sessions
- Study Notes
- Flashcards
- Board views
- Reports

These components work together to provide a simple study planning and tracking system.

PROCEDURE

1. Login to Zoho Creator.
2. Open the option to create an application using Zia Assistant.
3. Provide a natural language description of the required Student Study Planner application.
4. Allow Zia to generate the initial application structure.
5. Create the required study-related forms and modules.
6. Add fields required for study tasks, Pomodoro sessions, notes and flashcards.
7. Generate reports for displaying the stored records.
8. Create board views for organizing records based on selected categories.
9. Add sample records to test the application.
10. Verify the dashboard, forms, reports and board views.

FEATURES IMPLEMENTED

1. Study Tasks

The Study Tasks module is used to record and manage study activities. It includes information such as title, description, due date, priority and status.

2. Pomodoro Sessions

The Pomodoro Sessions module records focused study periods using start time, end time, duration and focus level.

3. Study Notes

The Study Notes module allows important study information to be stored with a title and corresponding content.

4. Flashcards

The Flashcards module stores revision questions and answers along with their difficulty and review information.

5. Board Views

Board views organize records into separate categories, making the information easier to understand and manage.

6. Dashboard

The dashboard provides a visual summary of the study planner using counters, status information, quick links and charts.

RESULT

Thus, the Student Study Planner application was successfully created using Zia Assistant in Zoho Creator. The application includes study task management, Pomodoro session tracking, study notes, flashcards, reports, board views and a dashboard for monitoring study activities.
